Tigers of the World: The Science, Politics and Conservation of Panthera tigris (Noyes Series in Animal Behavior, Ecology, Conservation, and Management)

Tigers of the World: The Science, Politics and Conservation of Panthera tigris (Noyes Series in Animal Behavior, Ecology, Conservation, and Management)

The second edition of *Tigers of the World* explores tiger biology, ecology, conservation, management, and the science and technology that make this possible. In 1988, when the first edition was published, tiger conservation was still in its infancy, and two decades later there has been a revolution not only in what is known, but how information about tigers is obtained and disseminated. In the fast changing world of conservation, there is a great need to summarize the vast and current state-of-the-art, to put this into historical perspective, and to speculate in what yet remains to be done. *Tigers of the World, 2e* fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume. Despite the challenges ahead, there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists, conservation biologists, wildlife managers, natural resource policymakers, and most importantly the caring public.

*Examines the past twenty years of research from the world's leading tiger experts on biology, politics, and conservation.

*Describes latest methods used to disseminate and obtain information needed for conservation and care of this species.

*Includes coverage on genetics and ecology, policy, poaching and trade, captive breeding and farming, and the status of Asia's last wild tigers.

*Excellent resource for grad courses in conservation biology, wildlife management, and veterinary programs.

*New volume continues the classic Noyes Series in Animal Behavior, Ecology, Conservation and Management.

In a situation you wish to purchase the e-book, you can open their official web-site along with order it. Have a nice study.

Ada Peterson:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library or even make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading through is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Tigers of the World: The Science, Politics and Conservation of Panthera tigris

(Noyes Series in Animal Behavior, Ecology, Conservation, and Management) can make you experience more interested to read.
