How to STEM: Science, Technology, Engineering, and Math Education in Libraries

How to STEM: Science, Technology, Engineering, and Math Education in Libraries

During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums.

The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs.

Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

From reader reviews:

Michael Hamrick:

In other case, little persons like to read book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. You can choose the best book if you like reading a book. Given that we know about how is important a book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can understand everything! From your country until foreign or abroad you will find yourself known. About simple factor until wonderful thing it is possible to know that. In this era, we can easily open a book or even searching by internet device. It is called e-book. You may use it when you feel bored to go to the library. Let's examine.

Lou Whisenhunt:

Hey guys, do you really wants to finds a new book to learn? May be the book with the concept How to STEM: Science, Technology, Engineering, and Math Education in Libraries suitable to you? Often the book was written by well known writer in this era. The book untitled How to STEM: Science, Technology, Engineering, and Math Education in Libraries is one of several books that everyone read now. This specific book was inspired a number of people in the world. When you read this e-book you will enter the new shape that you ever know before. The author explained their strategy in the simple way, thus all of people can easily to know the core of this book. This book will give you a lots of information about this world now. So that you can see the represented of the world in this book.

Kevin Hamby:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill actually analytical thinking? Then you are receiving problem with the book as compared to can satisfy your short time to read it because all of this time you only find guide that need more time to be learn. How to STEM: Science, Technology, Engineering, and Math Education in Libraries can be your answer because it can be read by an individual who have those short extra time problems.

David Moore:

Reading a book to get new life style in this year; every people loves to read a book. When you learn a book you can get a lots of benefit.
