## **How Evolution Is Scientific** Shane Killian

When one of the foremost creationist organizations attempted to prove that evolution is not scientific using reasonable criteria, educator and documentarian Shane Killian worked to set the record straight. Even as a non-scientist, he was easily able to find copious evidence for evolution and show that it is scientific, whereas creationism and Intelligent Design are not-using the very same criteria the creationists used. If you've ever had any doubts about the validity of the theory, this book should provide more than enough information (meticulously sourced for those seeking to verify its claims) to put them to rest, even in its brevity and plain-spoken manner, as it runs the gamut from planets to microbes, from the depths of the sea to the top of the world, in the human body itself, and even delving into the realm of the computer to show evolution in action all around us.
