Rudolf Spielmann

The Art of Sacrifice in Chess (Dover Chess) Rudolf Spielmann

"The beauty of a game of chess is usually appraised, and with good reason, according to the sacrifices it contains. On principle we incline to rate a sacrificial game more highly than a positional game. Instinctively we place the moral value above the scientific. We honor Capablanca, but our hearts beat higher when Morphy's name is mentioned." — Introduction.

Perhaps the strongest Austrian-born grandmaster of the 20th century, Rudolf Spielmann (1883–1942) defeated such world-class opponents as Nimzovich, Tartakower, Bogoljubov — and even the great Capablanca. Among the reasons for his success was his mastery of the art of sacrifice. In this groundbreaking classic, distilled from 40 years of tournament play, he outlines the hard-won lessons that enable a player to win games by giving up pieces!

Drawing on dozens of his own games against such topflight players as Schlechter, Tartakower, Bogoljubov, Reti, Rubinstein and Tarrasch, Spielmann describes and analyzes various types of sacrifices: (positional, for gain, mating) and real sacrifices: (for development, obstructive, preventive, line-clearance, vacating, deflecting and more). The result was the first systematic attempt to explain and exploit the theory of chess sacrifice; it remains an extremely helpful and useful weapon in the arsenal of chess players at every level.
