Neurobiology Essentials for Clinicians: What Every Therapist Needs to Know (Norton Series on Interpersonal Neurobiology) Arlene Montgomery

A primer on brain functionality as it relates to therapeutic work.

This book presents an overview of the latest theories of affect regulation and focuses on how these theories work in clinical settings and how therapists can be taught to implement them. The notion of teaching and learning will be extended by the theories themselves—the author presents methods of education that enact the theories being taught.

The book is divided into eight chapters, each one highlighting a particular structure or related structures of the brain. Suggestions for learning how to clinically apply the neurobiological/neuroanatomical information are offered. What is so unique about this book is that the bulk of the chapters are clinical dialogue, accompanied by neurobiological commentary. Thus, readers can see for themselves, during the course of parts of sessions, just how a “neurobiological outlook” can inform therapeutic understandings of what clients are doing and saying. The result is a very user-friendly learning experience for readers, as they are taken along a journey of understanding various brain systems and how they relate to psychotherapeutic principles.

Elegantly bridging the gap between the academic and clinical domains, this book is essential for anyone interested in the application of neurobiological principles to psychotherapy and wishes to learn about neurobiology without feeling overwhelmed or intimidated.

Ruth Haakenson:

Why? Because this Neurobiology Essentials for Clinicians: What Every Therapist Needs to Know (Norton Series on Interpersonal Neurobiology) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will distress you with the secret this inside. Reading this book beside it was fantastic author who all write the book in such amazing way makes the content inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This excellent book will give you a lot of advantages than the other book get such as help improving your expertise and your critical thinking approach. So , still want to postpone having that book? If I were being you I will go to the guide store hurriedly.

Robert Landers:

Is it you who having spare time subsequently spend it whole day simply by watching television programs or just lying on the bed? Do you need something new? This Neurobiology Essentials for Clinicians: What Every Therapist Needs to Know (Norton Series on Interpersonal Neurobiology) can be the response, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?

Pamela Eckert:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or even make summary for some guide, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that looking at is not important, boring along with can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Neurobiology Essentials for Clinicians: What Every Therapist Needs to Know (Norton Series on Interpersonal Neurobiology) can make you really feel more interested to read.
