Text Book of Animal Breeding R. Thiagarajan

This book is very much useful for the second year students of B.V.Sc. course who are studying in veterinary colleges all over India. Veterinary Council of India recently changed the syllabus for the veterinary undergraduate students so as to make uniform veterinary curriculum. In this circumstances, Livestock and Poultry Breeding, a course in the third semester seems to be a tougher one for the below average as well as average students. At present, there is no single book available to cover all the topics. A student should go through at least six to eight books which were all written in very high standard of English. Students studied in vernacular languages in their school may need a book like this one in simple English, covering all the syllabus. This book deals with History of Animal Breeding, Different methods of selection, Complications of selection, Response to selection, Inbreeding, Outbreeding, Crossbreeding, New breeds of Livestock, Nucleus Breeding System and Livestock Breeding Policy of India. This book is also useful for post graduate students of Animal Genetics and Breeding to face National Eligibility Test (NET) conducted by Agricultural Scientists Recruitment Board(ASRB) , Veterinary graduates who are all pursuing competitive exams conducted by State Public Service Commissions and Biology/Veterinary graduates preparing for Union Public Service Commission
